Marit,

Thank you for the revised figure. Yes, this will be a tentative approval letter. A final approval letter will be issued contingent on receipt of the bond money.

Thanks,
April

Emily - Please scan figure to file **M/47/0120**. This will replace the figure submitted today 9/29/2014.

April,

Thanks for meeting with me this morning. The enclosed pdf is a revised Figure 7.2. I added asterisks after the words "Active Mining Topography" and then added a footnote asterisk with sentences that say, "* Note: Active mining pit slopes will be reclaimed to 1H:1V or flatter. This is shown on Figure 16.2." I believe this addresses Leslie's question, please let me know one way or the other.

And, based on our conversation today, it sounds like you think the preliminary approval letter will be prepared and sent out by the end of this week, correct? Let me know if there is anything else you need or have questions about to facilitate the preliminary approval process.

Again, thanks for your time today!

Marit Sawyer
